

Harshit Bisht

Almora, Uttarakhand / harshit.bisht.22@gmail.com / 8126352708

Summary

To obtain a challenging position in the field of computer science as a Frontend Developer or Tester that utilizes my technical skills, creativity, and passion for problem-solving, while allowing me to learn and grow within a dynamic and collaborative team.

Education

Master of Computer Applications MCA

Galgotias College of Engineering & Technology, Greater Noida, Uttar Pradesh

06/2019

Overall percentage: 73%

Bachelor of Computer Applications BCA

SSJ Campus Almora, (Kumaun University), Almora, India

06/2017

Overall percentage: 65%

Intermediate (12)

Beersheba School Almora (CBSE), Almora, India

05/2014

High school (10)

Kendriya Vidyalaya Ranikhet (CBSE), Ranikhet, Uttarakhand

04/2012

Experience

Acuminous Software

QA Test Engineer, Gurugram, Haryana

01/2019 - 01/2020

Involved in manual testing of both products which further includes Installation testing, Sanity testing, Regression testing Functional testing, Performance testing, Compatibility testing.

Involved in running automated test scripts through IBM- RFT(Rational Functional Tester) which includes functional, performance, post installation testing scripts.

Running regression scripts on Linux- Red Hat 6.7.

Verification of logs in both Windows and Linux environment after running Automation scripts.

Bug logging & tracking using Bug Tracking tool- Issuenet. Preparing weekly status Report.

Skills

ReactJS, JavaScript, HTML 5, CSS, API testing, Testing, Java, SQL

Project

1. [Portfolio](#): The purpose of a personal portfolio using ReactJS, HTML, and CSS is to showcase your professional skills, projects, experience, education, and contact information in an attractive and easy-to-use format. The app should be responsive and user-friendly, allowing visitors to quickly find the information they need. The objective is to present your capabilities in a clear and concise manner to potential employers or clients.
 2. [Restaurant Menu](#): The goal of the restaurant menu app created with ReactJS, HTML, and CSS is to provide customers with an online platform to view the restaurant's menu, place orders, and make reservations. The app should have a visually appealing interface with clear menu items, descriptions, and pictures. Customers should be able to customize their orders, place them for delivery or pickup, and make reservations for dine-in service. The objective is to create a user-friendly app that improves the restaurant's ordering and reservation processes and enhances the customer experience.
 3. [Weather App](#): The goal of the Weather App with Open Weather API and ReactJS is to create a simple and easy-to-use platform for users to input a city name and obtain the current weather data. The app should retrieve the necessary data from the Open Weather API using an API key and present the information in a clear and concise manner. The aim is to provide a functional and visually appealing app that is accessible to users of all technical levels.
 4. [Data Analysis of Google App Ratings](#):
Description: App's rating, reviews, price, and installs have been analyzed against their respective categories. Dataset has been cleaned and downloaded from Kaggle.
Responsibilities:
Data analysis using Python, NumPy, and Pandas.
Data cleaning and visualization using Matplotlib.
 5. [Audio Player](#): The objective of an audio player is to provide users with an easy-to-use platform for playing music, with controls for playing, pausing, and skipping tracks, as well as displaying the next song in the queue. The app should also have features for creating playlists, shuffling songs, and adjusting volume levels, in order to create an enjoyable and personalized music listening experience for users.
-

STRENGTHS

- Positive Attitude
 - Honest & Punctual
 - Team Players
 - Willingness to learn new things.
-
